

Ebaco Indoor Rubber Flooring

Ebaco offers you a wide range of rubber floorings for your indoor sports and other requirements. We offer both tiles and roll format for rubber flooring, but recommend rolls in India due to the dimensional instability of many rubber products in hot and humid environments. The rolls come in different thickness from 4 MM up to 10 MM. Tiles can come in thickness up to 60 MM and even more. There are multiple color options-the more color the more expensive the product is.

One of most recommended & stocked product of Ebaco comes in Roll Form which is widely used in weightlifting & gym area, and it is made of 85% black rubber granules and 15% synthetic EPDM granules.

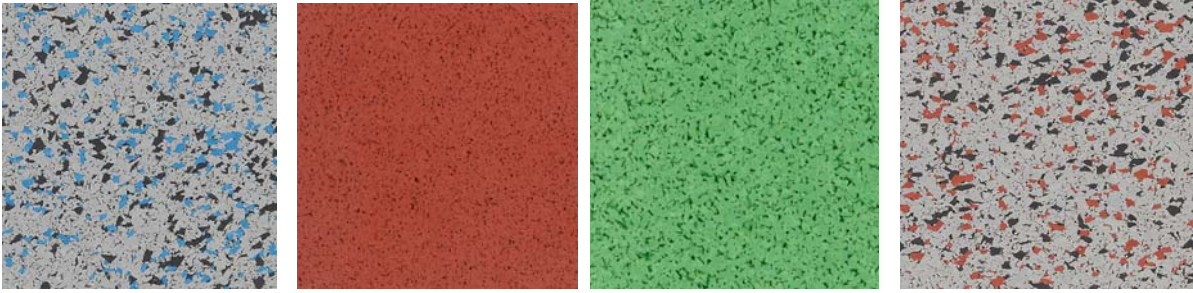

Technical Specifications

- *Density (kg/m³):1000/1200
- *Hardness (Shore a):68
- *Stretch (MPA):2.2
- *Abrasion resistance: 0.0075g (ASTM-D4060-01)
- *Rebound resistance: 55%
- *Friction coefficient: trends μ s: 0.995 .trends μ k: 0.930
- *Shape deformation: 42%
- *Length (m):10 \pm 5cm
- *Width (m):1m \pm 5mm
- *Thickness (mm): 4-10mm \pm 0.3mm

Advantages

- *Multiple colors are available allowing you to pick and choose design patterns and color combinations
- *Multiple thicknesses are available to meet your budget requirements
- *High abrasion resistance: tough and long lasting
- *Acoustically can provide up to 16 db with thickness of 8 and 10 MM
- *Low indentation properties: you can put heavy things on it without indentation
- *Environmental friendly, non-toxic
- *Recycled, non-pollution
- *Moderate and adjusted hardness
- *Excellent resilience, wear well
- *Soft, anti-slip, anti-fatigue
- *Convenient installation and easy maintenance

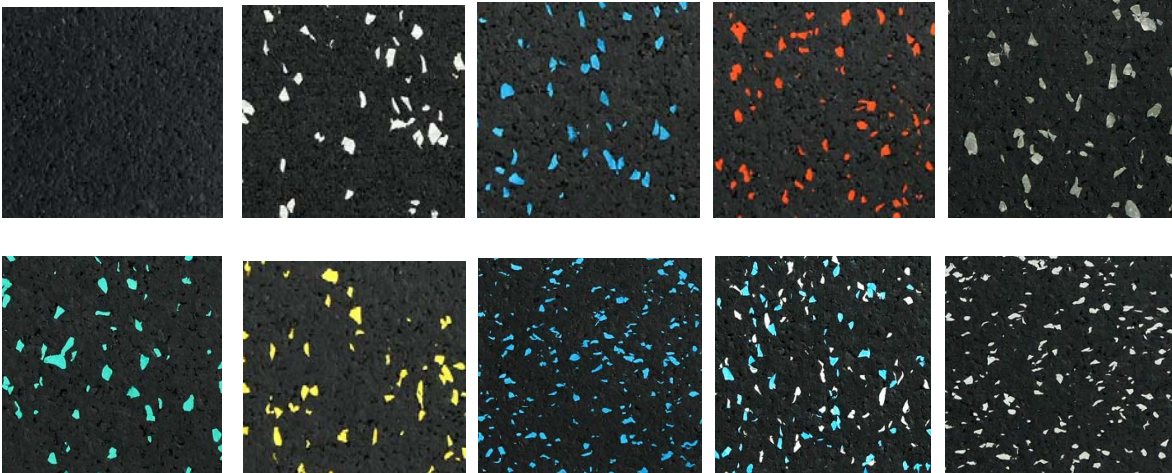

Recommended Areas of Usage

- *Gyms
- *Weight lifting areas
- *TV studios and other acoustical areas with heavy duty usage
- *High traffic areas where heavy items would be used
- *Indoor running tracks
- *Ice skating rinks

85% SBR - 15% EPDM Series Colors
